煙囪
散熱效應*
Chimney Effect*

De'Longhi暖爐的卓越性能可歸功於煙囪散熱效應。獨特的垂直散熱片設計，可更有效促成煙囪散熱效應，有效加速空氣對流並向上散熱，讓熱空氣能更快地散發到房間中。
Exceptional performance thanks to the "chimney effect". The exclusively designed elements form a series of vertical shafts which develop the "chimney effect": passing through them, the air is warmed and moved upwards, thus creating a continuous convectional flow with high thermal exchange and rapid emission of warm air into the room.

2 擺放位置是重點 Positioning matters

大家都忽視了「擺放位置」的重要性。秘訣是利用De'Longhi電暖爐發出的熱量阻隔冷空氣流進室內，從而提高加熱效果。在房間中，請將De'Longhi電暖爐放於冷空氣較易流進室內的地方，如窗戶旁邊或與室外接觸的牆壁旁邊，詳情請參閱產品說明書。

Everyone ignores the importance of "positioning". The trick is to let the heat generated from the De'Longhi oil-filled radiator to isolate cold air from flowing into the room, so as to enhance the heating effect. Please put the De'Longhi oil-filled radiator at place which has contact with cold air outside the room, such as window or wall that has contact with outdoor cold air. For more details, please refer to the product instruction manual.
